Winter Water Wisdom

Before cold weather sets in:

Turn off and fully drain sprinkler or irrigation systems.

Identify your home's freezing points.

Locate your main shutoff valve and know how to shut off your water.

Protect your pipes and wrap them with insulation or heat tape.

Eliminate sources of cold air near water lines by closing off crawl spaces, fixing drafty windows, insulating walls, attics and around doors.

See a Leak? You could save!

Customers who spot a leaking fire hydrant, dripping water main or a leak in a Cash Water line could save \$25 off their next bill!

Call us to report it!
